

Filming and Instructions for Video Uploading

Guidelines for Filming

- For the video submission, please allow a maximum **4.5m x 4.5m** stage and film close to enable clear visibility of faces.
- Please film your students early, in case of illness, issues uploading or the need to refilm.
- Under **NO** circumstances may the official JUMP JAM instructional DVD/Video or video soundtrack be used during filming, immediate disqualification will occur. Please use the music CD only or MP3 file.
- Good natural lighting is essential. Limit shadows over performer's faces & bodies. (Examples shown on video link below)
- Use a clean backdrop e.g. a Curtain. Or remove all visible clutter. If possible
- Use a single camera shot from the front/middle of room. No film editing permitted.
- Use a **tight frame** from left to right side of picture. All team members need to be in the frame at all times. Remember we need to see faces so get as close as possible without chopping anyone out. If the odd hand, foot or arm gets cut off that's OK. Keep tight, within a **4.5m x 4.5m** frame for your staging/filming area. A common problem for judging is when teams use a bigger stage area and/or the spacing's are very wide, it is difficult to see all team members' faces/expressions clearly. Which affects their scores.
- It is highly advisable to use a Hi Definition video camera for extra clarity in landscape mode.
- We have compiled some examples of 5 team video submissions, to show you what we mean by natural lighting, tight formations and quality of camera/high-definition video. Click this link [Video Submission Examples](#)
